Summary

I am Frontend Web Developer and I want to be a great team player in your company. Also, I am a bachelor's (external) degree student at Tashkent University of Information Technologies majoring in Economics and Management with a focus on ICT.

How can I contribute a value to the development of your business?
I can help the growth of the team through the technologies I know (and am learning) with experienced team members.

How do I work?
- Writing tasks with boards in Notion
- Working Git and Github with team members
- Styling UI elements with Tailwind CSS, CSS/SCSS, Bootstrap, Styled Components and Material UI
- Using NPM or Yarn as a package manager
- Statically analyze code using ESLint
- Following common code style with Prettier
Also, I am currently learning new technologies such as Jest (testing framework) in order to easily test React JS and Next JS projects.

I often choose Next.js with a combination TypeScript especially when it is important for a business to add new functionality quickly and often.

How do I choose base frameworks?
- For applications with a heavy emphasis on Front-End interactivity, a large number of static pages - I try to use Next JS and TypeScript
- For SPA applications - I opt React JS with Vite

I listen, read, speak and write fluently in Uzbek (native), and English (B2).

Ready to learn backend development

My goals are to learn more about JavaScript both Frontend and Backend development, work and succeed in a team more often and to be JavaScript and Software Engineer in the future

I am grateful if you liked my work, knowledge and my experience :)

Experience

📘 Frontend Developer
Supermiya
Sep 2022 - Jan 2023 (5 months)
Projects:
- Top-memory - is a memory development and recall platform covering various mnemonic disciplines

- Development of landing pages (https://superintizom.uz, https://marafon.superintizom.uz/, https://supermiya.uz/) and online courses platform with 1000+ users; Implementation of an online payment form with high traffic.

Role: Junior Frontend Developer

Responsibilities:
- Worked with challenging algorithms in order to create mnemonic quizzes and disciplines
- Created UI components that are widely used in basic parts of the platform
- Used React Context API for state management during the project
- Contributed to the testing framework (Jest) that easily integrates with React JS and allows testing in JavaScript and TypeScript code
- Implemented online courses platform with experienced full-stack developers
Frontend Developer
Itransition Group
May 2022 - Jul 2022 (3 months)
- Implemented Personal Collection Management Project
- Created UI elements using React JS, Redux Toolkit, Material UI
- Worked with Experienced Backend Developer

Education

Tashkent University of Information Technologies
Bachelor's degree, E-Commerce/Electronic Commerce
Sep 2020 - Jun 2025
External Course Student at Tashkent University of Information Technologies

Academic Lyceum under University of World Economy and Diplomacy
Exact Sciences, Exact Sciences
Sep 2018 - Jun 2020

Licenses & Certifications

Responsive Web Design Certification - freeCodeCamp

JavaScript Algorithms and Data Structures - freeCodeCamp

Skills

JavaScript • TypeScript • React.js • Redux Toolkit • CSS / SCSS / Tailwind CSS / Styled-components / Bootstrap / Module CSS / Material UI • HTML5 • Next.js • Jest • Git • GitHub
